

AEGIS

Insulation Tester

“Ideal for electricians & tradespeople”

Conduct insulation resistance tests.

As insulation (megger) testing is an essential task for all electrical contractors and tradespeople, it makes sense to have the best tool on the market to complete the job. And with its easy to read illuminated analogue display, the CZ20055 fits the bill perfectly.

Lightweight and easy to use, the CZ20055 provides user selectable voltage outputs of 250V, 500V and 1000V. Continuity testing ranges of 3Ω and 500Ω are also provided for basic connectivity testing.

The illuminated analogue display of Aegis Insulation Tester means that you can see results at a glance. The lock button feature will hold the last reading in place until reset, allowing you the time to make a detailed recording of the results.

A live circuit warning LED and hazardous voltage alarm are provided as standard to alert the user if accidental connection to a live circuit it made prior to conducting any testing.

Insulation Tester

If you're involved in the commissioning, maintenance and testing of electrical installations, you need the CZ20055. Packed and presented in a hard carry case to protect the unit whilst it's not in use. It also includes two probe leads as well as a single lead fitted with an alligator clamp which is provided to allow better maneuverability and safety when conducting tests.

01

Easy to read illuminated analogue display

02

Live circuit warning

includes hard carry case

03

Simple mode select
Hand held or free standing operation

04

Meets EN61326 and EN61010-1, CAT III 1000V.

SPECIFICATIONS

1 Measurement		2 Accessories		3 Physical	
Range	3Ω,500Ω, 100MΩ/250V, 100MΩ/500V, 400MΩ/1000V, 600V/ACV	Leads	2 x Probe leads 1 x Alligator lead	Dimensions	200 x 92 x 50mm (packed unit)
Operating Temp.	0° to 40°C	Batteries	6x 1.5V AA Alkaline (included)	Weight	700 grams
Storage Temp.	-10° to 60°C				
Display	Analogue				

Aegis has designed,
manufactured and supplied
Australian industry with test
equipment for more than 80 years
and we now services a wide range of
international customers in the data,
electrical, gas, telecommunications,
and water industries.
