

AEGIS

Test Phone Contractor Hands Free

“Designed for the Telecommunications Contractor”

Hands Free, Rugged, and Water Resistant

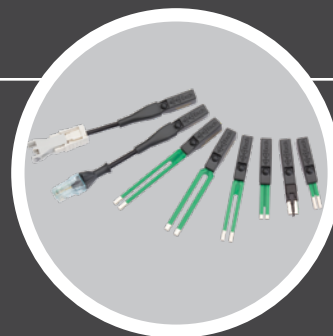

The Aegis CZ20252 Test Telephone is designed for use by line installers, repair technicians and other authorised personnel for telecommunications line testing and temporary communications.

The CZ20252 Test Telephone performs all the functions of a base level test phone (buttinski) and has added features such as speakerphone, 13 number memory, and is QuickSwitch ready for connection to Krone, Siemens, Madison, and many other termination blocks.

Voltage testing, polarity, and a high impedance monitor mode make this phone suitable for everyday use on today's modern networks.

Importantly, the CZ20252 meets IEC60529 IP54, meaning dust and water ingress are virtually eliminated in expected operating conditions.

The CZ20252 is ready to perform every time. Light weight and loaded with features, the Aegis Test Telephone is a great tool for contractors, trade and regular users.

Aegis Test Phone

All the features a contractor needs - rugged, hands free, & QuickSwitch ready. Test anywhere, anytime, with ease.
