

WCM - ISOT II

ISOLATION TRANSFORMER UNIT

The Most Advanced Isolation Transformer unit on the Market

Designed to avoid tripping of main switchboard RCD systems during the testing of portable RCD units. The use of this **Wavecom** unit prevents the main switchboard protection circuit from inconveniently cutting power to the rest of the site, and avoiding costly power shut-downs during mandatory testing.

This new Gen II Isolation Unit has been created to overcome the problems of other units currently on the market. Features such as switchable power input, output and input power indicators, built-in fuse holder with spare fuse carrier and sloping front test socket to accommodate various RCD shapes and bodies.

The WCM-ISOT II with its rugged and ergonomically designed casing featuring impact resistant and flame retardant plastics, has been specifically designed and manufactured in Australia by Wavecom Instruments to meet international standards.

Features

- Incorporates fuse protected input power switch
- Input power indication (RED neon)
- Output power indication (GREEN neon)
- Detachable input power cable (standard IEC to 3 PIN AUST)
- Ergonomic design
- Impact Resistant and Flame Retardant housing
- Built in carry handle
- Robust and lightweight construction
- High visibility
- Optional Adaptor, 20Amp, 3 Pin socket to 10Amp, 3 Pin plug, c/w 10Amp current limit
- Fully Australian designed and manufactured to our AS/NZ specifications

Note- output power is limited to 500mA, 240V AC and must not be used for any other purpose.

Order Information

Isolation transformer

|Part No: **WCM-ISOT II**

20Amp/3Pin socket to 10Amp/3Pin plug adaptor

|Part No: **WCM-20/10 Adaptor**

This product is totally Australian Designed and manufactured, using premium grade components and materials
